## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: between the sensor unit and the rest of the arrangement.

3. Claims 4 and 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4 and 12 “the coupling head” and “the electric socket” lack positive antecedent basis.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3611

5. Claims 1-4 includes the use of the word "for" which indicates intended use. In apparatus, article, and composition claims, intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. In re Casey, 370 F.2d 576, 152 USPQ 235 (CCPA 1967); In re Otto, 312 F.2d 937, 938, 136 USPQ 458, 459 (CCPA 1963).

6. Claims 1-2, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gentner et al. '511.

A trailer coupling arrangement for a motor vehicle including a trailer coupling, a coupling ball and a ball neck, said coupling arrangement comprising:

a drive motor 80;

a control unit 200;

wherein motion of the trailer coupling is prevented or stopped when torque UD of the drive motor exceeds a specified reference value.

***Allowable Subject Matter***

7. Claims 3-4, 11-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3611

*Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kleb et al., Reuter et al., and Gentner et al. '709 disclose trailer hitches with drive motors.
